For nearly three decades, defense workers labored in secret to build the "Underground." Twenty fuel storage tanks, each 250 feet in height, were built in just two years and eight months. On the average, one man died every two months during construction of these massive storage tanks. Our tour will take us inside to see this spectacular facility.

After the tour, join us for a Pau-Hana Party at Cafe Bronco. The menu will include suckling roast pig, prime rib, baked salmon, shrimp tempura, won ton, scallops with Chinese peas, fried chicken, crab legs, ahi poke, smoked tako, rice, noodles and more. Drinks are on your own.
